This spreadsheet provides an analysis of the mines of Harn.

This data was gathered by examining the Kingdom maps produced with the respective Kingdom modules for Harn. Any errors or omissions which are noted would be gratefully received. Please send any comments to jeremybaker@mac.com.

Data collection & analysis was carried out by Jeremy Baker, with considerable assistance from Christian Duntgen. Ken Snellings & Sophia Tribad provided many useful comments.

Kingdom regions

(version 6, 24 March 2003)

	North Melderyn	South Melderyn	Western Tharda	Eastern Tharda
Clay	7	0	4	0
Copper	7	1	5	0
Gypsum	3	1	2	0
Iron	3	2	18	0
Lead	12	0	1	4
Mica	0	0	1	0
Quarry	22	14	19	10
Salt	5	2	14	4
Silver	3	0	4	0
Tin	10	1	5	1
Zinc	11	0	0	2
	83	21	73	21

Because Melderyn & Tharda have such extensive mineral deposits, which fall into two distinct regions (particularly in the case of Melderyn), the base data is organised into two sub-regions for these two kingdoms.

This analysis indicates which realms are dominant in which minerals. Melderyn & Tharda are clearly the mineral superpowers of Harn.
